## **Bait & Set 2-Day Rodent Mass-Trapping Program**

Our 2-Day Rodent Mass-Trapping Program is designed to swiftly and effectively manage light rodent infestations and new invasions. This comprehensive service includes several key components tailored to ensure complete control of the rodent problem at your property:

- **RODENT MASS-TRAPPING TECHNIQUES:**
  - Deployment of a variety of traps, including mechanical, electrical, conventional, live capture, and industrial glue boards, strategically placed to capture rodents efficiently. These traps are baited and set to address the specific characteristics of the infestation.
- **PEST REMOVAL SERVICE (NEXT DAY):**
  - Prompt removal of all live and deceased rodents, their droppings, and trapping equipment the day following initial trap setup. Note: Glue boards will remain as part of the ongoing control strategy.
- **PROPRIETARY PHEROMONE NEUTRALIZER:**
  - Application of a proprietary neutralizer that eradicates the pheromones left in rodent droppings and urine. This neutralizer not only disinfects the area by killing 31 bacteria strains and 19 viruses but also prevents the attraction of new rodents within a 5-mile radius.
- **EXTERIOR RODENT BAIT STATIONS:**
  - Placement of poison baits around the exterior of your property to prevent incoming rodents from entering, ensuring a comprehensive perimeter defense.

This program is ideal for quickly addressing new or light rodent issues, providing you with peace of mind through effective pest management and prevention techniques. For more details or to schedule this service, please contact us today.

*\*Rodent bait stations are sold separately and are available to enhance the effectiveness of the trapping program.*

## **30-Day Live Tracking Bait & Trapping Program**

Our 30-Day Live Tracking Bait and Trapping Program is specifically designed for handling established rodent populations using advanced technology and effective treatment methods. This comprehensive program is ideal for both residential and commercial properties facing persistent rodent issues. Here's what the program includes:

- **SMART RODENTS TECHNOLOGY:**
  - Utilization of cutting-edge live camera tracking to monitor rodent activity 24/7, allowing precise targeting and effective management.
- **RODENT MASS-TRAPPING TECHNIQUES:**
  - Deployment of a variety of traps, including mechanical, electrical, conventional, live capture, and industrial glue boards, strategically placed to capture rodents efficiently. These traps are baited and set to address the specific characteristics of the infestation.
- **RODENT POISON BAITS:**
  - Strategic placement of various bait forms including liquids, solids, and our exclusive proprietary blend of poison attractants. These are carefully placed in high-traffic areas within the rodent colony to ensure maximum uptake.
- **PEST REMOVAL SERVICE:**
  - Professional removal of accessible dead rodents and their droppings during follow-up services, maintaining a clean and hygienic environment.
- **PROPRIETARY PHEROMONE NEUTRALIZER:**
  - Application of a proprietary formula that neutralizes rodent urine and pheromones, effectively reducing future infestations. This powerful solution also kills 31 strains of bacteria and 19 different viruses, ensuring a thoroughly sanitized space.
- **LITE RODENT EXCLUSION SERVICE:**
  - Basic exclusion measures to seal off minor entry points around the property, preventing new rodents from entering the treated areas.

This program is tailored to deliver not just immediate relief but also long-term prevention, using sophisticated methods to tackle rodent infestations comprehensively. For more information or to schedule a consultation, please contact us today.
