Pest Control Service Rotation

For each scheduled service appointment, we will implement a unique pest control strategy to ensure comprehensive pest management.

1. **During our first visit:** We will deploy our proprietary chemical pesticide blend through a widespread application.
2. **On the subsequent visit:** We will focus on applying our activated pesticide dust to key areas such as cracks, crevices, voids, and outlets.
3. **On our third visit:** We will introduce our specialized pesticide bait formula, complemented by a precise aerosol liquid application targeting essential areas, including the wheels and legs of appliances, equipment, and furniture.

This approach completes a full pest control program within just 90 days!

1

Distribution of our exclusive pesticide chemical blend across the premises.

PESTICIDE CHEMICALS

Pyrethrum and **Pyrethrin**, extracted from Chrysanthemum flowers, provide an immediate and effective knock-down solution against German cockroaches.

Insect Growth Regulators (IGRs) complement this by targeting and disrupting pest development, ensuring control for up to 120 days.

Pyrethroids, as a synthetic alternative to Pyrethrin, offer greater residual impact.

Combining these elements, we've formulated a potent mix of **3.5 Oz per Gallon**, creating a comprehensive pest management strategy that ensures **QUICK ACTION, PROLONGED CONTROL, AND BROAD-SPECTRUM EFFICACY.**

2

Targets key areas like appliance compressors and electrical panels.

PESTICIDE DUST

Next, we strategically apply a specially formulated pesticide dust to key infestation points.

This advanced dust formulation is designed for a swift action, capable of eliminating pests through contact or ingestion within just a few minutes of exposure.

Additionally, its waterproof properties ensure that the effectiveness is not compromised in damp or humid conditions, making it ideal for a wide range of environments.

Impressively, this pesticide dust continues to protect against infestations with an enduring residual effect that lasts up to 8 months, providing long-term relief from pest problems.

3

Deployment of effective baits and targeted liquid aerosol pesticides.

BAITS & AEROSOL

On the third visit, our approach intensifies with the introduction of a sophisticated pesticide bait formula, specifically engineered for maximum effectiveness.

This is further enhanced by the application of a carefully targeted aerosol liquid. This phase focuses on treating critical yet often overlooked areas such as the wheels and legs of appliances, equipment, and furniture, ensuring that pests have no refuge within your space.

This meticulous and strategic application method is part of our commitment to leaving no stone unturned in our pest control efforts.

By integrating these advanced techniques, we ensure a thorough and comprehensive pest management solution.

For larger facilities exceeding 1200 square feet or those dealing with **active pest infestations**, a specialized pest control approach is implemented, which includes:

Comprehensive Assessments:

Identify the types of pests, their locations, and the severity of the infestation.

Customized Treatment Plans:

Tailored to the specific needs of the facility, incorporating mechanical, chemical, and biological control methods.

Rodent and Filth Fly Control:

Added to our service is the management of rodents and filth flies, ensuring a broader pest control scope.

COMPLIANCE

ADVANCE

Our *Advanced* pest control service now delivers a comprehensive solution in just one visit, including:

- **Advanced Chemical Blend Application:** We apply a proprietary mix of chemicals throughout the area to start the pest control process.
- **Targeted Pesticide Dust:** Key spots like cracks, crevices, and outlets receive our activated pesticide dust for deep-seated pest eradication.
- **Specialized Baits and Aerosol Treatments:** We deploy bait formulas and precise aerosol sprays to critical areas, including appliance legs and furniture, for thorough coverage.
- **Rodent and Filth Fly Control:** Added to our service is the management of rodents and filth flies, ensuring a broader pest control scope.

This multi-solution approach ensures immediate, comprehensive pest management, significantly improving upon the traditional 90-day schedule.

4

Comprehensive Rodent and Filth Fly Control: A Dual-Focus Approach

DUAL-FOCUS

Our Rodent and Filth Fly Control feature enhances our pest management services by addressing both rodents and filth flies comprehensively. This approach includes:

- **Advanced Rodent Management:** Utilizes trapping, baiting, and environmental modifications to control and prevent rodent infestations.
- **Filth Fly Suppression:** Focuses on eliminating breeding sites, applying insecticides, and using traps, coupled with sanitation recommendations to prevent infestations.
- **Integrated Pest Management:** Combines physical, chemical, and biological strategies for a tailored, effective solution against both pests.

This dual-focus service offers a broader pest control scope, ensuring a healthier, pest-free environment.

Advanced ULV Technology: Precision Pest Control for Critical Areas

FLUSH ON-DEMAND

The "Critical-Area Flush on Demand with ULV Machine" in our premium service utilizes advanced Ultra-Low Volume (ULV) technology for targeted pest control. This method:

- **Efficiently Applies Pesticides:** Produces fine droplets for deep penetration and comprehensive coverage in critical areas.
- **Targets Precisely:** Focuses on hard-to-reach spots where pests hide and breed, ensuring effective treatment.
- **Responds Quickly:** Allows for on-demand flushing to tackle pest outbreaks immediately, preventing escalation.
- **Ensures Superior Control:** Offers an unmatched level of pest management, significantly reducing infestations.

This feature represents our commitment to advanced, efficient, and precise pest control solutions.

Filth Fly Suppression: Targeted Strategies for a Fly-Free Environment

FILTH FLIES

Our Filth Fly Suppression service implements a targeted approach to control and prevent fly infestations:

- **Breeding Site Removal:** Identifies and eliminates areas where flies breed, such as decaying matter and stagnant water.
- **Insecticide Application:** Uses specific insecticides in key areas to effectively reduce fly populations.
- **Trapping:** Places strategic traps to capture adult flies, cutting down on reproduction.
- **Ongoing Monitoring:** Continuously checks and adjusts methods to ensure lasting fly control.

This concise strategy ensures a reduction in fly infestations, promoting a cleaner, safer living or working space.

Eliminating Pest Breeding Grounds: Floor and Bar Rail Drainage Systems

DRAIN SERVICE

Our Drain Service enhances pest control efforts by including comprehensive drain cleaning and treatment.

This service aims to:

- **Eliminate Breeding Grounds:** Cleaning drains removes organic matter and debris, preventing pests like flies and roaches from breeding.
- **Enhance Sanitation:** By keeping drains clean, we improve the overall cleanliness of your environment, reducing pest attractions.
- **Boost Effectiveness:** Treated drains support our broader pest control measures, ensuring a more pest-resistant environment.

This service is integral to maintaining a clean, pest-free setting.

Streamlined Enhanced Rodent Control for Maximum Efficacy

RODENTS

Our Enhanced Rodent Control feature leverages cutting-edge techniques for superior rodent management, outperforming standard services with:

- **Advanced Trapping and Baiting:** Uses the latest technology for better rodent capture rates.
- **Integrated Pest Management (IPM):** A holistic strategy blending various methods to reduce rodent populations effectively.
- **Exclusion Methods:** Seals entry points to block rodent access, preventing future infestations.
- **Environment Modification:** Adjusts habitats to deter rodents, including decluttering and sanitation improvements.

Designed for immediate impact and long-term prevention, this service ensures your premises remain rodent-free through sustainable practices.

ULTIMATE PEST CONTROL

Comprehensive, Compliant, and Cutting-Edge Solutions in One Premium Package!

In conclusion, our premium pest control service sets a new industry standard by integrating advanced pest management techniques with enhanced features for unparalleled effectiveness.

From the initial application of our advanced chemical blend to the precision of our ULV machine for critical-area flushing, every aspect of our service is designed for maximum impact.

We offer comprehensive solutions for both common and challenging pests, including rodents and filth flies, with a special emphasis on maintaining regulatory compliance.

Our approach not only addresses immediate pest concerns but also ensures long-term prevention and control, making it the ultimate choice for those seeking a pest-free environment with the added assurance of health and safety compliance.
